

ROLEMIR KIRK DON D. ZAYAS

Davao City, Philippines | r.zayas.551640@umindanao.edu.ph | github.com/kirkiboi

Fourth-year Computer Science student with a strong foundation in full-stack web development, database management, and software engineering. Experienced in developing academic, personal, and industry-based web applications, with hands-on experience in system design, role-based access control, payment integration, and application deployment. Seeking opportunities to apply technical skills, contribute to software projects, and continue developing as a software developer.

EDUCATION

University of Mindanao	2023 – Present
Bachelor of Science in Computer Science	
Relevant Courses: Data Structures and Algorithms, Software Engineering, Web Development, Database Management	

EXPERIENCE

Software Development Intern / OJT	July 2026 – September 2026
- Contributed to the development and maintenance of a full-stack event registration and management system using Next.js, MySQL, and JavaScript. - Developed and integrated event registration, payment processing, QR-based ticket verification, and attendance tracking features. - Implemented role-based access control to support separate administrative and staff workflows. - Worked on automated notification features for registration and event-related communications. - Integrated PayMongo for online payment processing and implemented webhook handling for payment confirmation. - Worked with Git and GitHub using feature branches and pull requests as part of a collaborative development workflow. - Assisted with application testing, debugging, database management, and deployment-related tasks. - Created technical documentation and user guides for system features and administrative workflows.	

PROJECTS

L&C Smart Retail System Academic Project	Full-Stack Web Development
- Developed a full-stack retail management system for L&C LPG Center using Laravel, PHP, MySQL/MariaDB, HTML, CSS, and JavaScript. - Implemented Point of Sale (POS), inventory management, employee attendance tracking, and sales reporting modules to streamline daily operations. - Designed role-based authentication, stock monitoring with low-stock alerts, and automated report generation to improve operational efficiency and reduce manual record-keeping errors.	
UM Dining Center Operations System Academic Project	Full-Stack Web Development
- Collaborated on the development of a full-stack university cafeteria management system using Laravel, Blade, and MySQL. - Contributed to the implementation of inventory management, Point of Sale terminal, and financial reporting features. - Assisted in building role-based access control and audit trail functionality for multi-user operations. - Applied UI/UX principles using Figma for wireframing and prototyping prior to implementation. - Used Git and GitHub while collaborating on development, testing, debugging, and deployment.	

Hotel Reservation System *Academic Project*

Full-Stack Web Development

- Developed a hotel reservation platform using Java Swing and MySQL
- Implemented room availability management, booking workflows, and guest account management features.
- Designed and built an administrative dashboard for managing reservations, room inventory, and occupancy reports.

Landing Pages *Personal Projects*

Frontend Development

- Designed and developed multiple responsive landing pages using HTML, CSS, JavaScript, and React.
- Focused on accessibility and clean visual design across different screen sizes and devices.

Eventify Event Management System *Internship Project*

Full-Stack Development

- Developed and maintained a full-stack event registration and management system using Next.js, JavaScript, MySQL, and REST APIs focused on accessibility and clean visual design across different screen sizes and devices.
- Implemented event management and public registration features, allowing administrators to create and manage events while users can register for available events.
- Integrated PayMongo GCash payments and webhook processing to handle online registration payments and automatically update payment status.
- Developed QR-based digital ticketing and attendance verification, including a staff-accessible QR scanner for validating tickets and recording check-ins.
- Implemented role-based access control to provide separate permissions and workflows for administrators and staff.
- Developed a notification and communication system, including automated email notifications, notification templates, and scheduled event reminders.
- Worked with database migrations and relational data involving events, registrations, users, schedules, and notification records.
- Used Git and GitHub with feature branches and pull requests while collaborating on development, testing, debugging, and deployment.

SKILLS

Languages & Frameworks: PHP, Java, JavaScript, HTML & CSS, React, Laravel, Blade, Next.JS
Databases & DevTools: MySQL, Git & GitHub, Figma, VS Code
Soft Skills: Attention to Detail, Adaptability, Team Collaboration

SEMINARS AND TRAININGS

Software Quality Assurance in Modern Practice	2025
Frontend Development	2025
Office Etiquette, Work Ethics, Gender & Sexual Harassment Awareness Seminars	2026

CERTIFICATIONS

JavaScript Certification freeCodeCamp	2026
IT Specialist – Databases Certification Certiport	2026
IT Specialist – HTML & CSS Certification Certiport	2026
